

Big C

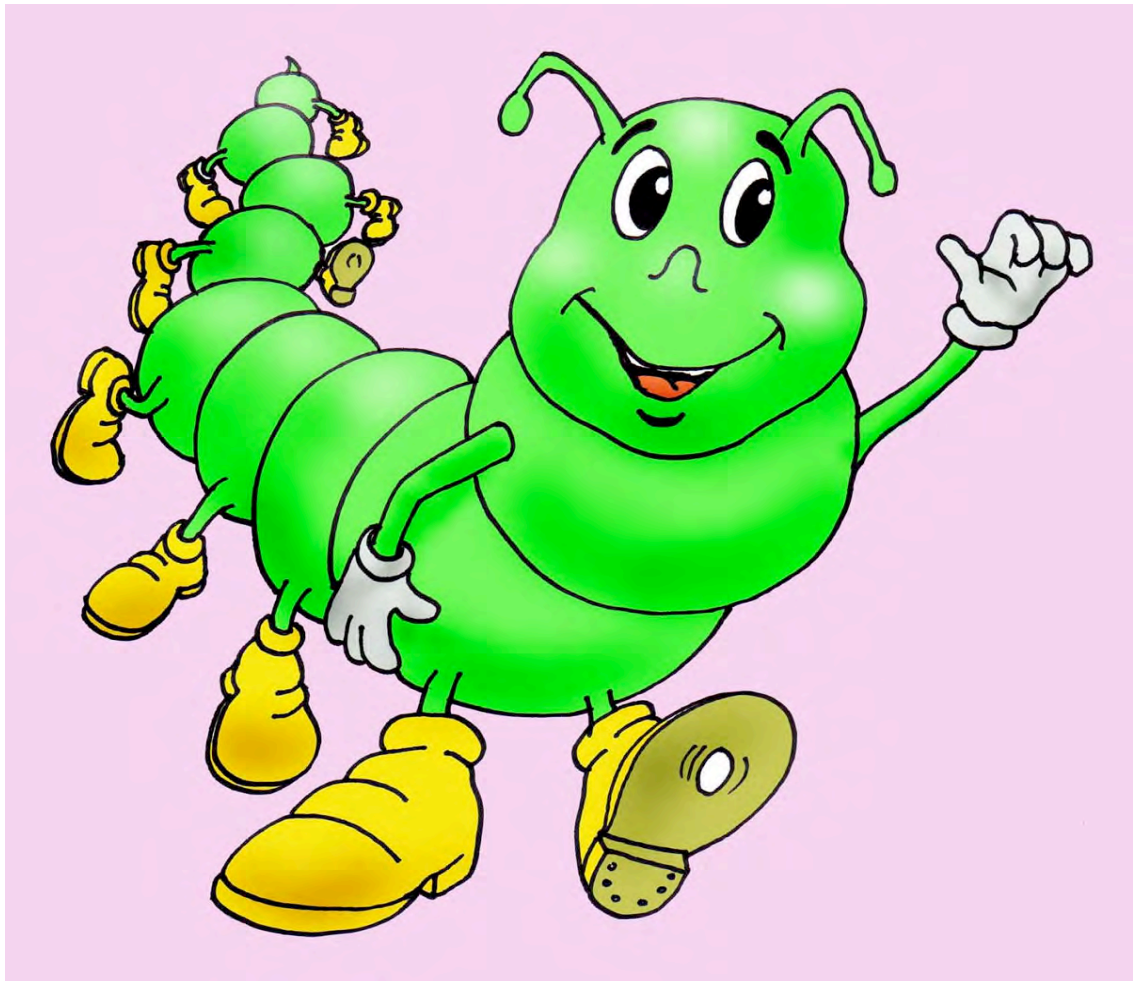

and little c

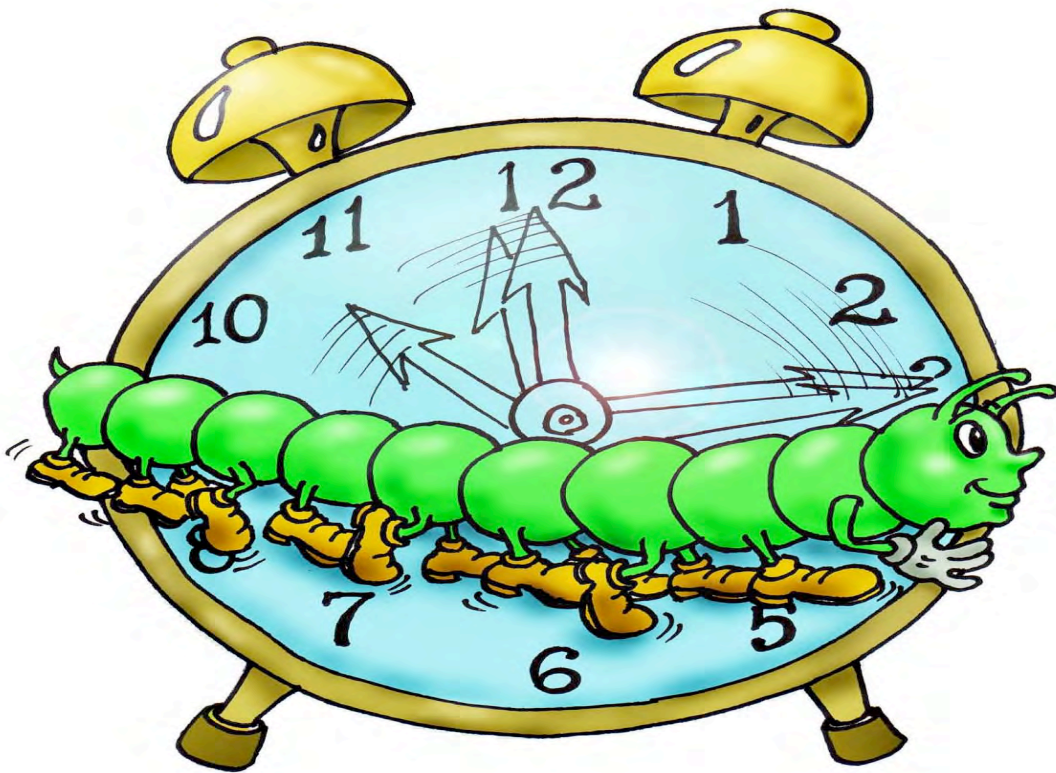

Big **C** and little **c**
wanted to see a
caterpillar.

They heard
caterpillars have lots
of feet and can
walk a long way.

In fact, caterpillars
can walk all day.

Big C and little c
went to a park to
find a caterpillar.

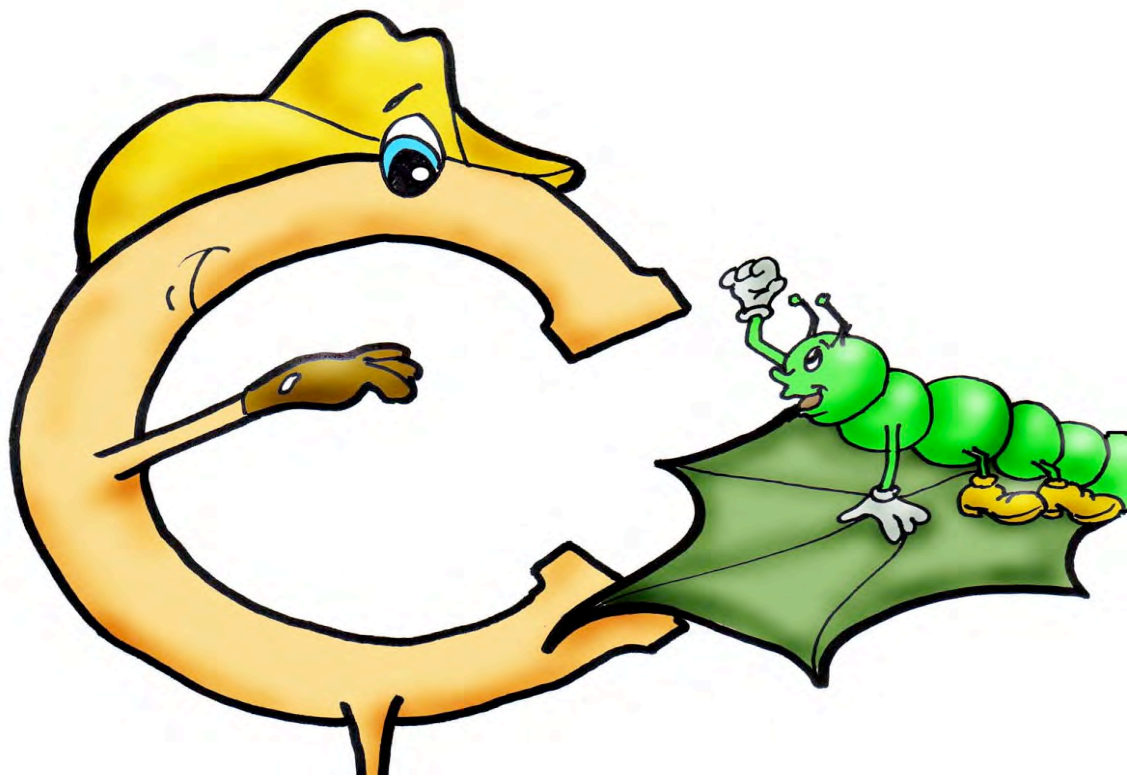

Caterpillars love to eat leaves. They live in bushes and trees.

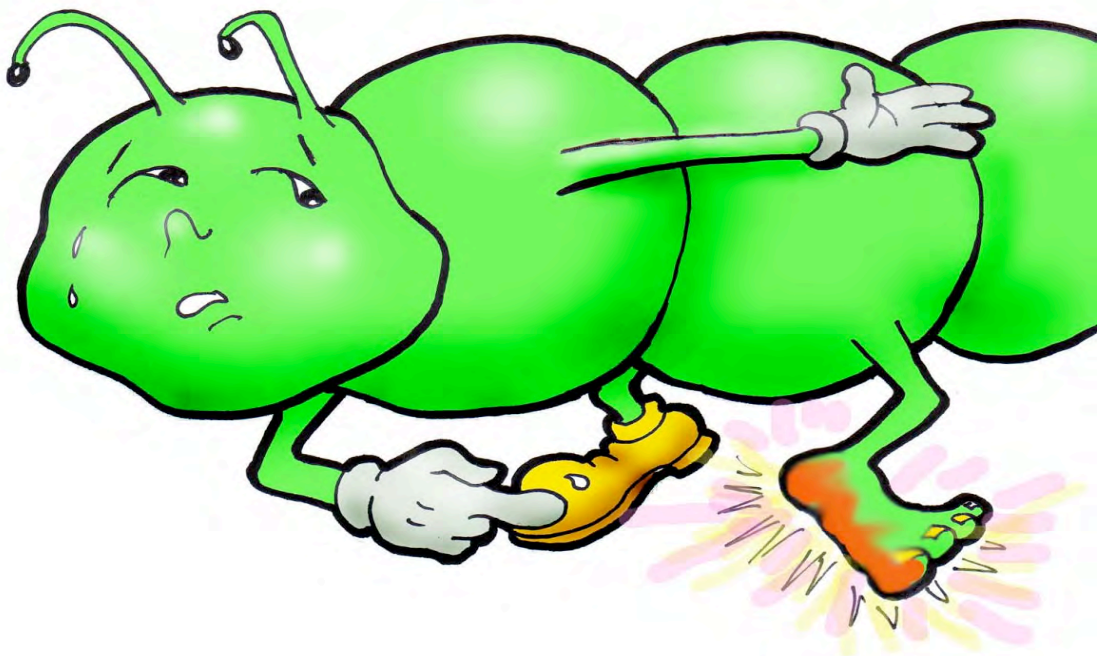

Big **C** and little **c**
found a **c**aterpillar
eating away on a
leaf that same day.

Big C and little c
asked the caterpillar,
“Will you walk
with us today?”

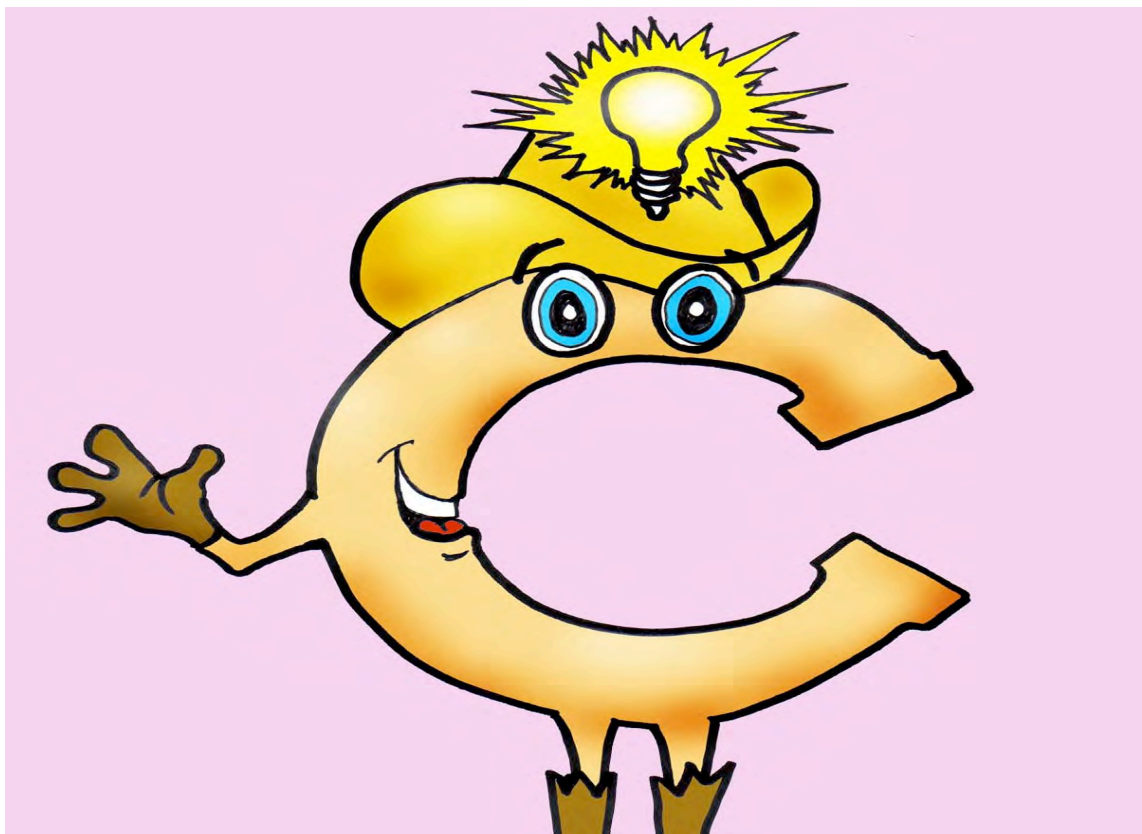

The caterpillar told
big C and little c
his feet hurt. He
had already walked
a long way.

Big C and little c
felt very sad the
caterpillar could not
walk with them.

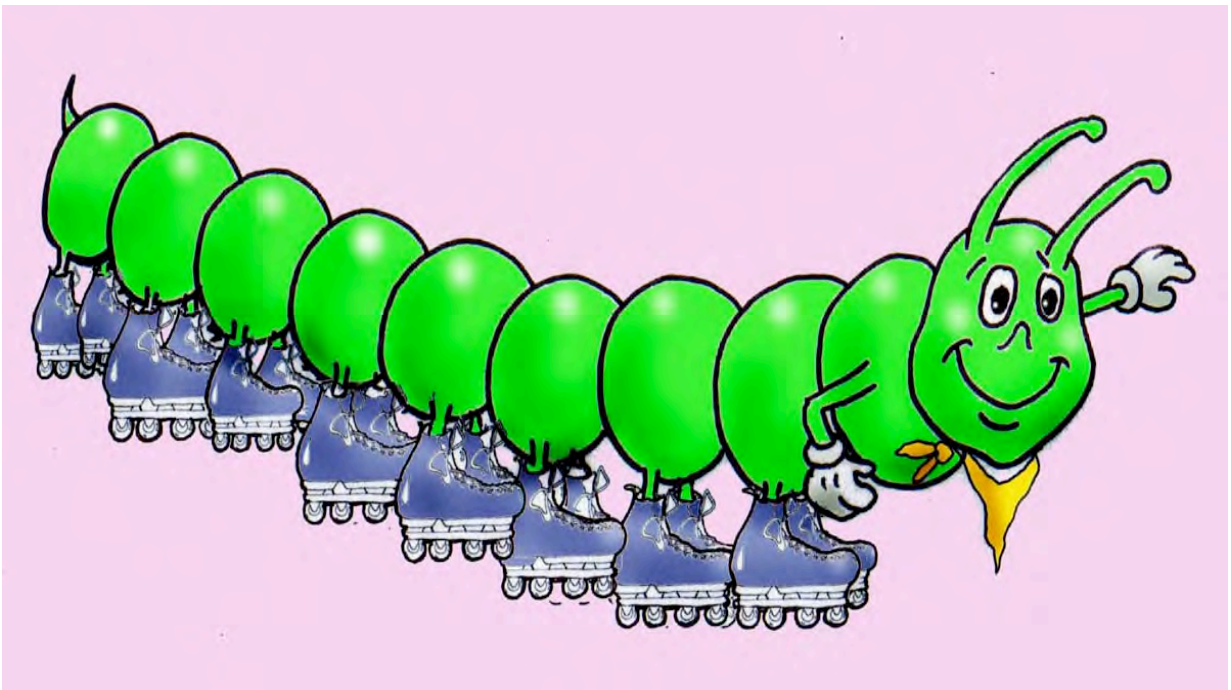

The next day, big C
and little c thought
of a way for the
caterpillar to
walk with them.

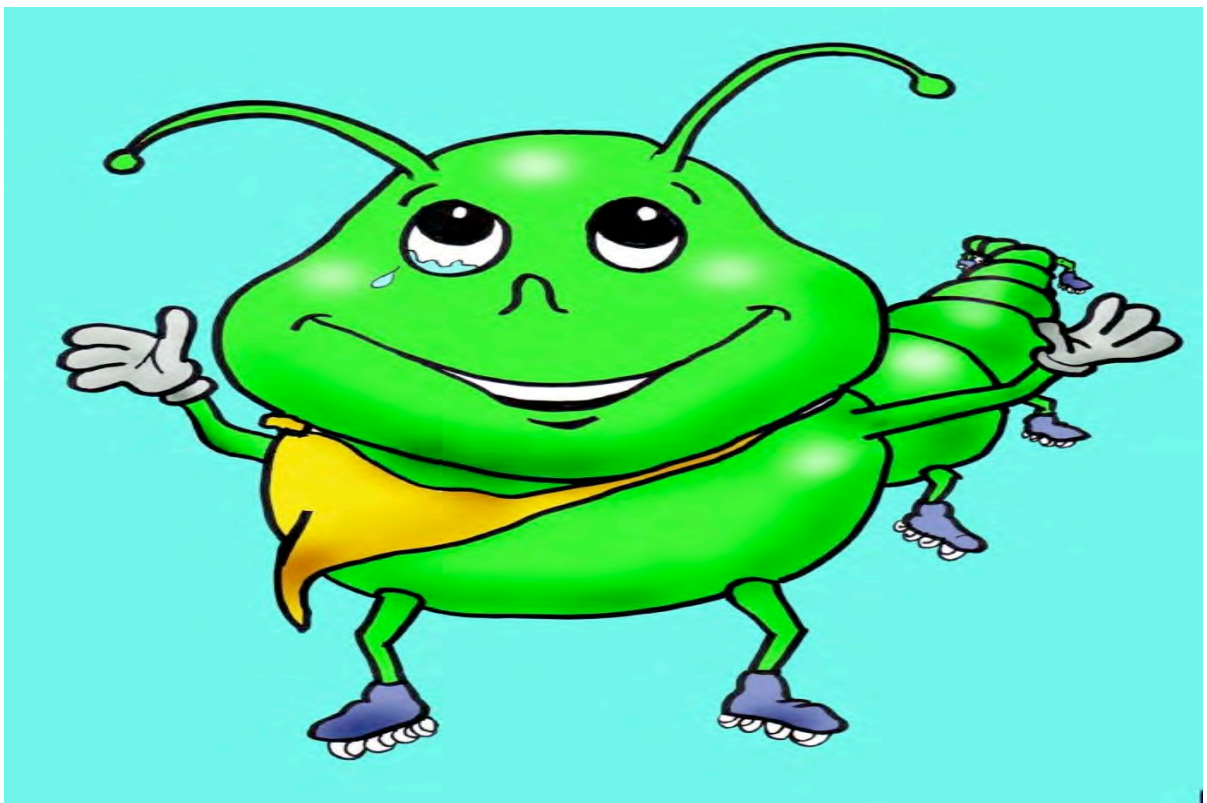

Big C told the caterpillar, “You can use roller skates that have wheels. You don’t have to use your heels.”

Big C and little c
ran to town and
bought sixteen
skates for the
caterpillar's
sixteen feet.

The caterpillar was
so surprised that
big C and little c
really cared about
him. It brought tears
to his eyes.

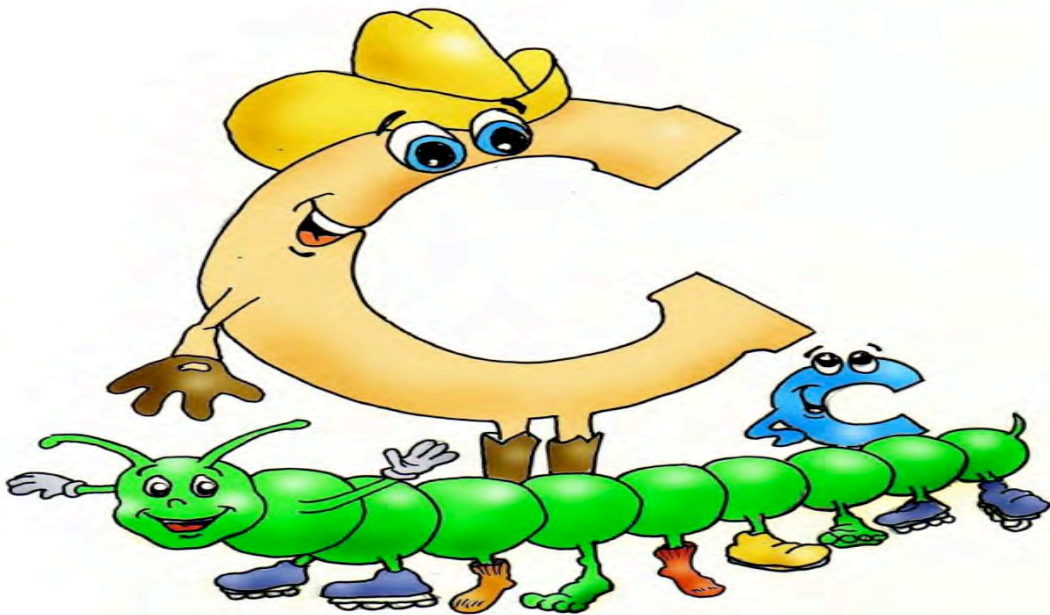

The caterpillar put
on the skates and
skated away with
big C and little c.

Today, big C,
little c and the
caterpillar walk,
talk, and skate
together every day.

Now the caterpillar's feet never hurt. He wears shoes and socks everyday. For long walks he always wears his skates.

Can you find big **C**
and little **c**?
